Critical Illness Insurance

No one is ever really prepared for a life-altering critical illness diagnosis. The whirlwind of appointments, tests, treatments and medications can add to your stress levels.

The treatment to recovery is vital, but it can also be expensive. Your medical coverage may only cover some of the costs associated with treatment. You’re still responsible for deductibles and coinsurance. If treatment keeps you out of work, the financial worries can grow quickly and stress levels may rise.

Critical Illness coverage helps provide financial support if you are diagnosed with a covered critical illness. With the expense of treatment often high, seeking the treatment you need could seem like a financial burden. When a diagnosis occurs, you need to be focused on getting better and taking control of your health, not stressing over financial worries.

Here’s How It Works

You choose benefits to protect yourself and any family members if diagnosed with a critical illness. Then, if diagnosed with a covered critical illness, you will receive a cash benefit based on the percentage payable for the condition.

Meet Ashley

Ashley’s story of diagnosis and treatment turned into a happy ending, because she had supplemental Critical Illness Insurance to help with expenses.

Here is what weighs heavily on her mind:
- Major medical only pays a portion of the expenses associated with my treatment
- I have copays I am responsible for until I meet my deductible
- If I am not working due to my treatments, I must cover my bills, rent/mortgage, groceries and my children’s education
- If the right treatment is not available locally, I will have to travel to get the treatment I need

Ashley is doing well and is on the road to recovery.

Ashley’s Critical Illness claim paid her cash benefits for the following:
- Wellness
- Coronary Artery Bypass Surgery

The cash benefits were direct deposited into her bank account.

For a listing of benefits and benefit amounts, see pages 3 and 4.

Ashley chooses Critical Illness benefits to help protect herself and her children, if they are diagnosed with a critical illness.

During Ashley’s annual wellness exam, her doctor noticed an irregular heartbeat. She underwent an electrocardiogram (EKG) test and stress test, which confirmed she had a blockage in one of her coronary arteries.

Here’s Ashley’s treatment path:
- Ashley has her annual wellness exam
- Her doctor notices an abnormality in her heartbeat; tests are performed and she is diagnosed with coronary artery disease
- After visits with doctors, surgeons and an anesthesiologist, Ashley undergoes surgery
- Surgery is performed to remove the blockage with a bypass graft. She is visited by her doctor during a 4-day hospital stay and released
- Ashley followed her doctor required treatment during a 2-month recovery period, and had regular doctor office visits

Ashley is doing well and is on the road to recovery.

EXCLUSIONS AND LIMITATIONS

Conditions and Limits
A diagnosis occurring before your coverage begins is not payable; however, a diagnosis of any covered critical illness or optional benefit after your effective date will be payable. Benefits are subject to the Pre-Existing Condition Limitation as well as all other limitations and exclusions. All critical illnesses must meet the definitions and dates of diagnoses stated in the policy and be diagnosed by a physician while coverage is in effect. Emergency situations outside the U.S. will be considered when you return to the U.S.

Pre-Existing Condition Limitation
Benefits are not paid for a critical illness that is caused by a pre-existing condition when the date of diagnosis is within 12 months after the effective date of coverage. A pre-existing condition is a disease or physical condition for which medical advice or treatment was recommended or received from a medical professional within 12 months prior to the effective date. A pre-existing condition can exist even though a diagnosis has not yet been made.

Exclusions
Benefits are not paid for: any act of war or participation in a riot, insurrection, or rebellion; intentionally self-inflicted injury; engaging in an illegal occupation or committing or attempting to commit a felony; suicide while sane or insane; injury sustained while being under the influence of alcohol, narcotics, or any other controlled substance or drug unless administered on the advice of a physician; participation in aeronautics unless a fare-paying passenger on a licensed common-carrier aircraft operating between established airports; substance abuse, including alcohol, alcoholism, drug addiction or dependence on a controlled substance.
